DETAILED ACTION

Claim Objections

Claim 22 is objected to because of the following informalities: the recitation "at a plurality of locations along said strut, wherein said strut is connected to an adjacent strut by a separate link" (line7-8) does not clearly indicate if there are many links for each strut or many links for a plurality of the struts and "the strut(s)" are the same as "the wave-shaped struts" as recited in line 5 of the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 22 recites the limitation "the struts" in line 6 and "said strut" in line 7. It is not clear that "the struts" and "said struts" recited in the claim are the same as "the waved-shaped struts" mentioned in line 5 of the claim or "the struts" are another kind of struts different from "the waved-shaped struts" mentioned in line 5 of the claim. Clarification is required.

Specification

The amendment filed 2/5/2007 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the claims. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: a wave "having no straight sections" (claim 21, line 5) and the wave-shaped struts having no straight sections (claim 22, line 5).

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21-22 are rejected under 35 U.S.C. 102(b) as being anticipated by SIMON et al. (5,354,308).

As to claim 21, SIMON (Fig. 1-5) shows stent 14. Stent 14 comprises wire 4 defining longitudinal wave struts with links 6 for maintaining the struts in a tubular structure. The frequency of the struts at the two ends of the stent is greater than the frequency of the struts in the intermediate section of the stent (Fig. 4).

As to claim 22, SIMON (Fig. 5) shows stent 14 having links 16 axially displaced in the manner as recited in the claim.
